abbreviations

Introduction

Chapter 1

theory

1.1 Developement Android

used programs(Android studio, VS)

1.2 technologies used

(Flutter, Dart, Firebase)

1.3 working method

(Git)

1.4 architecture

(MVC)

Chapter 2

conception

2.1 Modelisation

UML diagrammes

2.2 Code structure

2.2.1 models

bla bla and then listitems with description if needed

JSON parsing

2.2.2 controllers

2.2.3 views

small description on what are views and how are they used and implemented

2.2.4 widgets

Chapter 3

Implementation

3.1 Startup

sign in and up

3.2 Client case

flows

3.3 Restaurant case

flows

3.4 Deliverer case

flows

Conclusion
